Dear Colleagues,

We would like to invite you to a state-of-the-art one-day virtual symposium focusing on recent advances in the diagnosis and treatment of lung cancer and mesothelioma.

This seventh Royal Marsden lung cancer symposium will tackle burning issues and key challenges facing clinicians treating patients with lung cancer and mesothelioma, particularly in the COVID-19 era.

We have assembled clinical experts who will be talking on topics including lung cancer screening in the COVID-19 era, systemic and local therapies in NSCLC and SCLC, with a focus on immunotherapy and genomic-driven treatments, and the evolving treatment landscape in mesothelioma.

This conference will be of interest to any medical, nursing or other healthcare professionals involved in the treatment and management of patients with lung cancer and mesothelioma.

This is a unique opportunity to listen to the experts with ample opportunity for interactive discussions.

We very much hope you will join us for this exciting and challenging virtual session.

Professor Sanjay Popat
Consultant Medical Oncologist
Professor of Thoracic Oncology

Professor Mary O'Brien
Consultant Medical Oncologist
Professor of Medical Oncology

Dr Wanda Cui
Consultant Medical Oncologist
Lung Unit
